

ELECTROMAGNETIC POLLUTION IS HARMFUL

Electromagnetic pollution by Wi-Fi, mobile, etc. is ubiquitous and today's greatest source of environmental stress.

This chronic stress can cause a variety of ailments and illnesses like sleep disorders (very frequently), cardiovascular diseases, depression, dementia, tinnitus, diabetes, digestion disorders, infertility and many more. Ever increasing wireless communication and the "internet of things" will in future substantially increase this danger to our health.

Note: For more information on electromagnetic pollution and geopathic stress please consult our websites.

SIGNIFICANTLY REDUCES BODY STRESS AS PROVEN IN HEART-RATE-VARIABILITY TEST

Body stress levels of several test subjects were measured both with and without the Hamoni® Harmonizer set up. The test result was clear: „Indeed the result in each of these tests for each test subject was a significant reduction of the body's total stress index when the Hamoni® Harmonizer was set up at the test location.“

Test administrator Udo Grundmann, building biologist, former head of the German association of advancement of frequency medicine.

NLS-DIAGNOSIS TEST RESULTS PROMPT MEDICAL PRACTITIONER TO TALK ABOUT A "MIRACLE"

„Where use of up to 40 different homeopathic remedies, Bach flowers etc. was only able to achieve an average improvement of 20%–30%, the Harmonizer yielded an energetic improvement of approx. 80%! Improvements of 80% like observed when using the Hamoni® Harmonizer are extremely rare to achieve when testing a range of drugs. Each year we normally only observe this miracle (these test results) in extremely few patients...“
Mr. Lothar Kappes, medical practitioner from 38518 Gifhorn, Germany

Energetic improvements in organs of selected patients, measured with NLS diagnostic device "Metascan".

A further test by medical practitioner Mr. Stefan Mattausch from Nuremberg, Bavaria, can be found on our website.
